Website, membership, subscription and portal update

This note records the work completed on the CAMS Services Ltd website and parent portal on 19 August 2026. It describes what has been built, where it appears, and what still requires payment and ledger engineering before families can complete a live monthly Direct Debit or recurring card subscription.

CAMS stands for Chaperone Activity Mentor Support. The public message remains: Connect first. Then support change. The service is for children and young people aged 8 and above, subject to assessment, safeguarding, identified risk, suitable staff and availability.

1. Shareable CAMS link

A single public page has been added so that parents, carers, schools, children's homes and local staff can be sent one address by WhatsApp, text message, email or social media. The page introduces CAMS Services and then offers two principal routes: Become a CAMS Member, and Work With CAMS. It also provides Refer a Family and Contact CAMS, together with prepared sharing text and the organisation's published contact and directory listings.

Main shareable page: https://www.camsservices.co.uk/connect

The following shorter addresses redirect to the same page:

https://www.camsservices.co.uk/link https://www.camsservices.co.uk/link

https://www.camsservices.co.uk/bio https://www.camsservices.co.uk/bio

Related public pages linked from that hub:

Refer a family: https://www.camsservices.co.uk/referral

Contact: https://www.camsservices.co.uk/contact

Staff careers: https://www.camsservices.co.uk/careers

Staff application: https://www.camsservices.co.uk/become-a-trainer

2. Membership and Support Subscription as separate functions

The site and parent portal now distinguish CAMS Membership from the CAMS Support Subscription. Membership is the continuing relationship between the family and CAMS Services Ltd. The Support Subscription is the paid monthly allocation of support hours. A family may remain a member with portal access in a month when no paid subscription is in force. In that case the account would read: Membership status ACTIVE; Support Subscription status PAUSED; available support hours 0.

The public wording on the packages page states: Your CAMS Membership stays with you. Your Support Subscription can change as your family's needs change. Members may keep the current subscription, upgrade during the current period, choose a lower subscription from the next period, pause paid support from the next applicable period, restart paid support, or remain a member without purchasing hours every month. Ending membership is treated as a separate action from pausing paid support.

3. Monthly Support Subscriptions now shown on the website

Mercury, Venus, Earth and Jupiter are presented as monthly membership subscriptions with fixed prices and hours. Each card shows the package name, monthly price, included hours, a short description, membership benefits, and a button labelled Choose Membership.

Package	Monthly price	Hours each month
Mercury Membership	GBP 75	3 hours
Venus Membership	GBP 145	6 hours
Earth Membership	GBP 210	9 hours
Jupiter Membership	GBP 270	12 hours

Principal pages:

Membership and subscriptions: https://www.camsservices.co.uk/packages

Home page summary of the four plans: https://www.camsservices.co.uk/

Mercury: https://www.camsservices.co.uk/packages/mercury

Venus: https://www.camsservices.co.uk/packages/venus

Earth: https://www.camsservices.co.uk/packages/earth

Jupiter: https://www.camsservices.co.uk/packages/jupiter

Family registration: https://www.camsservices.co.uk/register

Member portal sign in: https://www.camsservices.co.uk/login

4. Rules and wording added to the packages page

The packages page now also sets out:

- Flexible monthly support, including upgrade, next-period reduction, pause and restart.
- A worked example: Jupiter in September, Earth in October, paused support in November with membership remaining active, Venus in December.
- In-period upgrade differences: Mercury to Venus GBP 70; Mercury to Earth GBP 135; Mercury to Jupiter GBP 195; Venus to Earth GBP 65; Venus to Jupiter GBP 125; Earth to Jupiter GBP 60.
- A request to use all or part of remaining hours in one session, normally submitted at least 24 hours before the session, and subject to assessment, safeguarding, staff and approval.
- Expiry of unused standard hours at the end of the subscription period, with no automatic rollover.
- Waiting time of up to one hour where staff attend at the agreed time and the family or young person is delayed, unavailable or not ready.
- Community travel during an agreed support session as part of wider Chaperone, Mentor or activity duties, not driving in isolation.
- Eligible CAMS support, including chaperone work, mentoring, activity and community engagement, sporting and recreational activity, SEND-informed support where suitable, family support and agreed individual objectives.
- Pre-contract checkout information, including next billing date, hour expiry, waiting time, pause, cancellation, cooling-off information, Membership Terms, Subscription Terms, Privacy Notice and safeguarding.
- Consumer Contracts Regulations 2013: a 14-day cancellation period may apply. Where the customer asks CAMS Services Ltd to begin paid support during that period, the site records

the request: I request CAMS Services Ltd to begin providing my selected support during the applicable cancellation period.

The checkout call to action is worded: Start My CAMS Monthly Subscription.

5. Parent portal

Once a parent is signed in, the overview and billing screens display membership status and Support Subscription status as separate fields, together with available hours, hours remaining, hours expire on, and next billing date. The same screens list Change Subscription, Upgrade Subscription, Choose Next Subscription, Pause Support, Restart Support, Manage Payment Method and End CAMS Membership.

Parent overview: https://www.camsservices.co.uk/dashboard/parent

Billing: https://www.camsservices.co.uk/dashboard/parent/billing

When booking a session the parent may choose Use selected number of hours, or Use all remaining hours. The form then shows the hours available on the account.

6. Work with CAMS

The shareable page contains a staff route for people who wish to become a CAMS Chaperone, CAMS Mentor or CAMS Support Worker. It lists areas in which opportunities may arise and directs applicants to the careers and application pages to register interest, create a staff profile, and submit DBS, training, identification and other documents for assessment, safeguarding and matching.

Work with CAMS section: https://www.camsservices.co.uk/connect#work

7. What is not yet live

The website and portal copy, prices, hours and account layout described above are in the codebase. The following still require payment-provider and ledger work before a family can complete a live monthly collection and have every hour movement recorded to specification:

- Recurring Direct Debit and recurring card collection against a Support Subscription.
- In-period upgrade invoices for the difference between the current and higher monthly price.
- Next-period downgrade and pause taking effect on the next billing date, with membership remaining active.
- The full support hour ledger: allocated, reserved, completed, returned, upgrade additions, waiting-time deductions, expiry, administrative adjustments, reason, date, time and the staff member who made the adjustment.
- Session records showing booked and actual start and finish times, waiting start and end, hours deducted and remaining balance.
- Extension or credit of hours where CAMS Services Ltd cancels an approved session and the family cannot reasonably use the returned hours before the period ends.

Until that work is finished, families can still register, use the existing booking and hours arrangements, and read the membership rules on the public site. Live monthly subscription collection must not be advertised as complete until the payment and ledger functions are in production.

8. Publication

The live website at www.camsservices.co.uk was still serving an earlier build dated 12 August 2026 when this work was completed. A Vercel build error caused by rewriting the API address as an absolute https destination has been corrected. The new pages will appear on the public site only after the latest main branch is deployed as Production. Deploy the current main commit. Do not redeploy the earlier failed build labelled a7bad39.
